

Want to improve the way BLM public lands are managed within your state? Now is your opportunity

Sportsmen See Conservation Opportunity in the BLM's "Planning 2.0"

The Bureau of Land Management is currently requesting public input to revise land use planning for 245 million acres of public lands in the West. Some of our most valuable fish and wildlife habitat and hunting and fishing lands are at stake.

Dubbed "Planning 2.0," the process represents the first substantial revision in the BLM's land use planning since the agency first began developing land use plans almost 40 years ago.

An opportunity for sportsmen to ensure a strong future for the West's sporting heritage

Sportsmen in the West are dependent on publicly-accessible, highly-functioning BLM public lands, essential for producing quality big game, robust fisheries and maximizing sustainable hunting and fishing opportunities.

BLM's land use plans are the basis for every action and approved use on BLM managed lands and help to determine how and if fish and wildlife habitat conservation and management will be carried out.

Hunters and anglers are urging the agency to consider important lands and unfragmented habitats – and consider ways to responsibly administer them in order to conserve these places.

Planning 2.0 is our opportunity to create a BLM planning approach that directly benefits western hunters and anglers.

Take Action Now to Sustain our Hunting and Fishing Traditions

Please sign the sportsmen's petition, requesting that the BLM:

- Maintain public access to public lands for hunting and fishing.
- Safeguard priority fish and wildlife habitat, migration corridors and backcountry hunting and fishing areas.
- Restore, conserve and enhance important habitats on a landscape scale.
- Balance energy and other development with the needs of fish and wildlife.

Individuals can also provide comments directly to the BLM at [blm wo plan2@blm.gov](mailto:blm_wo_plan2@blm.gov).
